01. COMPANY

- We are a company, leader in design and quality inside the national market, dedicated to the manufacturing and marketing of vehicles for Passenger transport.
- Our main goal is customer satisfaction, through the continuous development and innovation of our products.

02. HISTORY

- Our beginnings date back to 1989, when Fernando Ugarte, with his idea of producing bodywork for passengers transportation under chassis of different brands, created “Autobus S.A”.
- Their first property was located in Pompey neighborhood with a 1700 m² of Surface capacity. In that same place, in 1990, the company started to manufacture bodywork and in the end of that year, the signature started to develop their product under **UGARTE** Brand, with a bigger product optimization.
- Due to the high trust of the product in the market, in 1998, the company started an expansion process, reforming an important property located in Juan Bautista Alberdi Av., n°7334, in Mataderos neighborhood that, actually, is used for the production of special and half-distance units.

05. QUALITY

➤ QUALITY CONTROL, STAGE BY STAGE.

During each stage of the process, each instance has strict quality control. In the last part of the process, we can count on the PDI, where each chassis mechanical component is being verified as the composition of the union between the bodywork and the engine.

Pre Delivery Inspection: Unit exhaustive inspection that guarantees a vehicle in optimal **mechanical** and **operational** conditions.

06. ACKNOWLEDGMENT

- During 2023, we obtained acknowledgment in the contest “Sello del Buen Diseño”, rewarding two of our own product designs: the driver’s cabin and the skylight.
- Our main goal is to keep working on constant development and innovation, as well as customer satisfaction.
